

HONGRU DA

Mobile: (+86) 136-6181-6738 | Email: dahongru2@gmail.com | Address: Shanghai, China

EDUCATION

University of Pennsylvania | M.S. Behavioral and Decision Science 2025.08-2027.01

Core Courses: Experimental Methods, Data Science & Quantitative Modeling, Judgements & Decisions, Statistical Reasoning, Organizational Behavior, Big Data Analytics

London School of Economics and Political Science | General Course 2023.09-2024.06

Core Courses: Finance (A+), Principles of Finance (A+), Statistical Model & Analysis (A+), Financial Accounting (A+), Mathematical Methods (A+), Management Accounting (A+)

East China University of Science and Technology | B.A. Financial Management | GPA: 3.85/4.0

2021.09-2025.06

Core Courses: Microeconomics, Macroeconomics, Finance, Advanced Mathematics, Linear Algebra, Probability & Statistics, Financial Accounting, Management Accounting, C Programming, Cost Accounting, Auditing

INTERNSHIP EXPERIENCE

Ernst & Young (China) Advisory Limited | Consulting Intern 2024.07-2024.08 Shanghai, China

- Streamlined overall business and application structure for the Digital department based on interviews and current-state assessments
- Identified key control points and developed standard templates by benchmarking against industry peers; established associated processes, systems, and management norms
- Built a system structure analysis model and a management-system indicator analysis framework; delivered the digital internal management system prototype and implementation plan
- Mastered tools including Power BI, SQL, and Tableau

CITIC Securities | Financial Management Department Intern 2023.08 Shanghai, China

- Researched ETF investment strategies including buy-and-hold, fixed investment, multi-asset allocation, style/sector rotation, and target-date allocation, plus trading strategies such as trend/reverse, intraday, grid trading, and futures arbitrage
 - Explored ETF arbitrage techniques (discount-premium arbitrage & futures arbitrage) and analyzed index enhancement strategies using Alpha-Beta combination to capture market Beta and seek excess returns
 - Examined financing and margin securities, highlighting core business elements and key risk-control indicators
-

RESEARCH & PROJECT EXPERIENCE

Income Labeling and Spending Norms | Experimental Methods | University of Pennsylvania. 2025.09-2025.12

- Designed and conducted a 2×2 mixed online experiment examining how income labels ("bonus" vs. "salary") shape normative judgments of spending appropriateness
- Built four outcome measures across indulgent and necessary spending scenarios grounded in mental accounting theory; conducted paired/independent-sample t-tests and linear regression using Python (pandas, SciPy, scikit-learn)
- Discovered a personal-social norm asymmetry: participants personally endorsed indulgent bonus spending more than they believed society would — contributing novel insight to the pluralistic ignorance literature

Football Match Outcome Prediction | Big Data Analytics | University of Pennsylvania. 2025.09-2025.12

- Processed 50,000+ football matches across 25+ seasons from Football-Data.co.uk via DuckDB and regex standardization; engineered geospatial, betting, and match-level features including travel distance, Bet365 implied probabilities, and shots on target
- Built and compared Logistic Regression, tuned Random Forest (GridSearchCV), and tuned MLP Neural Network — achieving best accuracy of 56.2%, an 8.8% uplift over the bookmaker baseline

- Applied feature importance analysis; visualized geographic home-win-rate patterns using Folium interactive heatmaps

Squelch the Blaze of Illegal Wildlife Trade | 2024 ICM Competition — Second Prize 2024.02

- Developed ARIMA + Elastic Net Regression model; standardized data for 100+ countries via Lagrange interpolation and range normalization; applied factor analysis and CRITIC method for indicator weighting
- Quantified project impact on trafficking volumes using Lasso-Ridge regression; validated model stability via sensitivity analysis under extreme conditions

SKILLS & LANGUAGES

Programming: Python · MATLAB · SQL · C · Tableau · Power BI

Languages: Mandarin (Native) · English — TOEFL 109 · GRE 332
